

DETE spray guns with gravity cup are an economically viable alternative to other brands and are ideal for working with smaller amounts of material. The good value for money goes of course also for all parts and accessories.

### GGM 15-10

The „Finishing gun“ with 750 ml nylon cup (cup with screw lid and lock from dripping and filter) supports highest finishing quality and a further reduction in pressure air from 25 to 30 % (environmental friendly spraying procedure).

Technical data:

Nozzle sizes: 1,2 / 1,4 / 1,8 mm  
Air consumption: 300 l/min  
Operating pressure: 2,0 - 2,5 bar  
Weight: 540 g

### GGM 24

The „Allrounder gun“ with 600 ml nylon cup. Especially ideal for all repair and maintenance work. The stainless steel nozzle can be adjusted to flat and round position and produces a constant fine atomization. Also suitable for processing of highly viscous materials.

Technical data:

Nozzle sizes: 1,4 / 1,7 / 2,0 mm  
Air consumption: 160 l/min  
Operating pressure: 3 bar  
Weight: 540 g

### Softspray 02

The „Filler gun“ with 750 ml nylon cup (cup with screw lid and lock from dripping), for professional surfaces and a further reduction in pressure air from 25 to 30 % (environmental friendly spraying procedure). Suitable for working with highly viscous materials – especially filler – with nozzles up to 3,0 mm.

Technical data:

Nozzle sizes: 2,5 / 3,0 mm  
Air consumption: 260 l/min  
Operating pressure: 3,0 bar  
Weight: 458 g
